DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Satoh et al (US 6,761,771) in view of Divakar et al (US 2002/0185487) and Storbeck (US 2002/0023590).

Satoh shows a ceramic susceptor claimed including a ceramic substrate made of aluminum nitride and deployed on a shaft, a resistive heating element made of tungsten and a plasma electrode formed interior of the ceramic substrate, and a concave formed in the wafer-carrying face. However, Satoh does not show the shafting being cylindrical and the claimed range for the concavity.

Divakar shows that it is known in the art to provide a shaft in the form of cylindrical to support the ceramic substrate.

Storbeck shows a susceptor having a concavity larger than .2mm or .5mm over the surface of the substrate having a 300mm diameter. Storbeck teaches that such concavity would allow a more stably situated wafer on the heating surface during the heating process.

In view of Divakar, it would have been obvious to one of ordinary skill in the art to adapt Satoh with the shaft with a cylindrical shape since such cylindrical shaft is well known in the art to adequately support a susceptor, and further adapt Satoh with the claimed concavity as taught in Storbeck to more securely support a wafer on the wafer heating surface.

Response to Arguments

3. Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sang Y. Paik whose telephone number is 571-272-4783. The examiner can normally be reached on M-F (9:00-4:00) First Friday Off.
